

How To Be Safe Online

- **Talk to people your own age**
- **Don't let people trick you into meeting them even if they sound nice. If that person says he really wants to meet you say my parents have to come.**

- **Don't give any valuable information about your self for example; pictures, your name, your friends screen names.**
- **People might try to become your friend by saying "I love to play soccer we should meet somewhere and play. But remember don't meet anyone you don't know.**
